

Where *elegance* is woven

Upholstery fabrics, curtains and technical textiles for hotels, developers and interior designers. Woven in Alexandria since 1969.

Five decades of *weaving* for Egypt's finest interiors

Founded in 1969 in Alexandria, Deebtex is one of Egypt's established textile manufacturers, serving the MENA region and international markets for over 55 years.

We produce upholstery fabrics, decorative curtains and technical textiles, engineered for the standards that hotels, residential projects and commercial interiors demand.

Our integrated factory takes yarn through warping, dyeing, jacquard weaving and finishing under one roof, so we keep quality consistent and stay flexible for custom orders and special treatments.
